

South West Queensland Dung Beetle Field Day

When: Friday 23 April 2021 — 8.30am to 3.00pm

What:

The Sargood's have successfully introduced and sustained a healthy population of dung beetles on their property. They are keen to share their success with other producers to ensure on-going breeding and expansion of dung beetle populations through Western Queensland.

Who:

The Field Day will include professional speakers on:

- 🌐 Dung Beetles Past, Present, Future - breeding and introduction as well as on-property demonstration of how to introduce and grow your dung beetle herd to ensure they thrive - *John Feehan*
- 🌐 Landcare Farming – the next decade - *Mick Taylor*
- 🌐 The Australian Sustainable Beef Framework - *Jacob Betros*
- 🌐 Rehydrating the Landscape - *Glenn Landsburg*

Did you know that dung beetles can:

- interrupt parasite life cycles
- aerate soil
- reduce fertiliser requirements
- clean paddocks
